Continuation Sheet (PTO-303)

continuation of 3A and "Note:"

Claim 1 is amended to replace "a record for a sequence information for each version of a genome sequence" with "records for a plurality of versions of a genome sequence." The scope of the claimed invention has been changed by this amendment because previously, it was a record for a sequence information for one version (at least one embodiment) of a genome sequence, but now in the amendment claim, it is multiple records not for a sequence information, but for a plurality of versions of a genome sequence. This change of scope clearly requires at least new consideration.

Claim 4 is amended to replace "wherein the location estimation unit determines the location of the target sequence" with ""wherein the location estimation unit is also for assigning a priority order to" The change is substantial because the role and function of the location estimation unit seems to have changed. This amendment clearly requires new consideration.

Claim 7 is amended to recite, among other things, an outputting step to output the location of the target sequence in the genome sequence to a user. This new limitation and step of the claimed process clearly requires further consideration and/or new search.

Continuation of 11:

Since applicant's arguments against the rejections set forth in the final rejection are essentially based on the amendments to the claims, and since the amendments have not been entered for reasons set forth above, all the rejections stand for the same reasons set forth in the final rejection.
